Dr. Rommel C. Bautista  
Schools Division Superintendent, CESO V  
Antipolo City

Dear Sir/Ma'am,

In today's global economy, keeping in step with the fast-paced technological innovations determine a country's economic position. The few but rich countries of the world are able to produce majority of the scientific and technological innovations that produce greater wealth, while the rest of the developing world lag behind as they fail to establish science and technology as a key driving force towards continued growth. The Philippines is no exception – therefore, the path to economic development depends on the importance we place on scientific research and technological innovation.

In connection with this, we would like to request your good office to allow us to conduct a Lecture/Forum for Grade 10 students on the topic "Global Trends in Science and Technology: A Challenge to High School Education". As such, the lecture will cater to different national high schools in your city of Antipolo, such as: Dalig MNHS, San Jose MNHS, Dela Paz MNHS, and San Roque MNHS. The purpose of the Forum is to:

- 1) Show different technological trends and the latest technological innovations which are already available in the more progressive countries
- 2) Explain possible societal issues and problems as to why we as Filipinos fail to innovate and create technology that will help grow our economy, and
- 3) Briefly tour the students in our Senior HS Campus to see the existing classrooms and facilities as part of our efforts to promote our Senior HS Program, especially to the STEM/ABM and Pilot Section students.

The event will last for 2-3 hours, which could be scheduled as part of the instructional hours of the students in Science. In order to encourage participation of the national high schools under your supervision, we are flexible with regard to the lecture/forum date so long as the appointments would be sometime this January or February on our Senior High School Campus in Cabrera Rd, Kaytikling, Taytay, Rizal.

Thank you and hoping for your consideration. We look forward to partnering with the high schools being supervised by your office.

Sincerely,

CARLOS JOVITO F. CAO  
Director for GFA-SHS
